Re: Panther Creek 2, LLC. Wind Turbine Project- Letter of Support

To whom it may concern,

The Gridley Public Library District Board of Trustees, supports the development of the Panther Grove 2, LLC Wind Turbine Project in Waldo Township and the surrounding Livingston County area. Our board has reviewed and discussed the potential economic impact analysis for this project, and we are convinced it will bring substantial benefits to our library, schools, and community.

In rural communities like ours, identifying funding sources can be a challenge. The Panther Grove II Wind Project represents an extraordinary opportunity to strengthen our financial foundation. The projected income from this project for our library will not only support our budget, but will allow us the opportunity to make needed structural upgrades as well as continue to provide valuable resources to the residents of our district.

Libraries provide opportunities for jobseekers, services for people with disabilities, library delivery for older Americans, and so much more. The importance of our libraries, librarians and library workers extends far beyond the bookshelf. We play an important role in the communities we serve by fostering lifelong learning and offering invaluable resources. We believe that allowing such a project to continue will impact the economic development of the library and provide future stability.

Thank you for your service to the citizens of Livingston County.

Sincerely,

Sheryl Solomonson
Director, Gridley Public Library District
